

One Step Ahead Let's Charge!

▶ APP

Charging Station Search and Filtering

Quickly search for nearby charging stations and use the filter to select the desired chargers.

Real-time Charging Status Tracking

Check the vehicle's charging progress and remaining charging time at ease.

Query of Historical Charging Records

Review past charging information, including the charging time, location, and cost.

Diverse and Convenient Payment System

Support multiple payment methods such as top-up in the balance account, credit card, and charging card.

Personalized Private Charger Settings

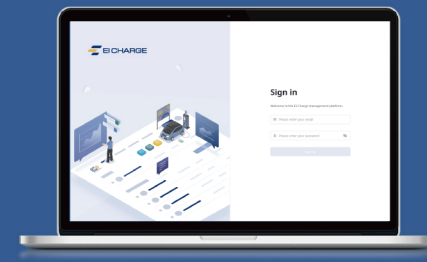

Add your private charger and customize its parameters. Connect it via Bluetooth or Wi-Fi.

▶ Backend

Visualized Data Dashboard

Display data such as charging status and charging income through graphical forms in real-time.

Intelligent Dynamic Load Balancing

Automatically adjust the power distribution of chargers to avoid overload risks.

Reports and Data Statistics

Customize the generation of charging data reports with over than 10 parameters.

Cross-platform Interconnection

Achieve interconnection with other platforms based on the OCPI protocol.

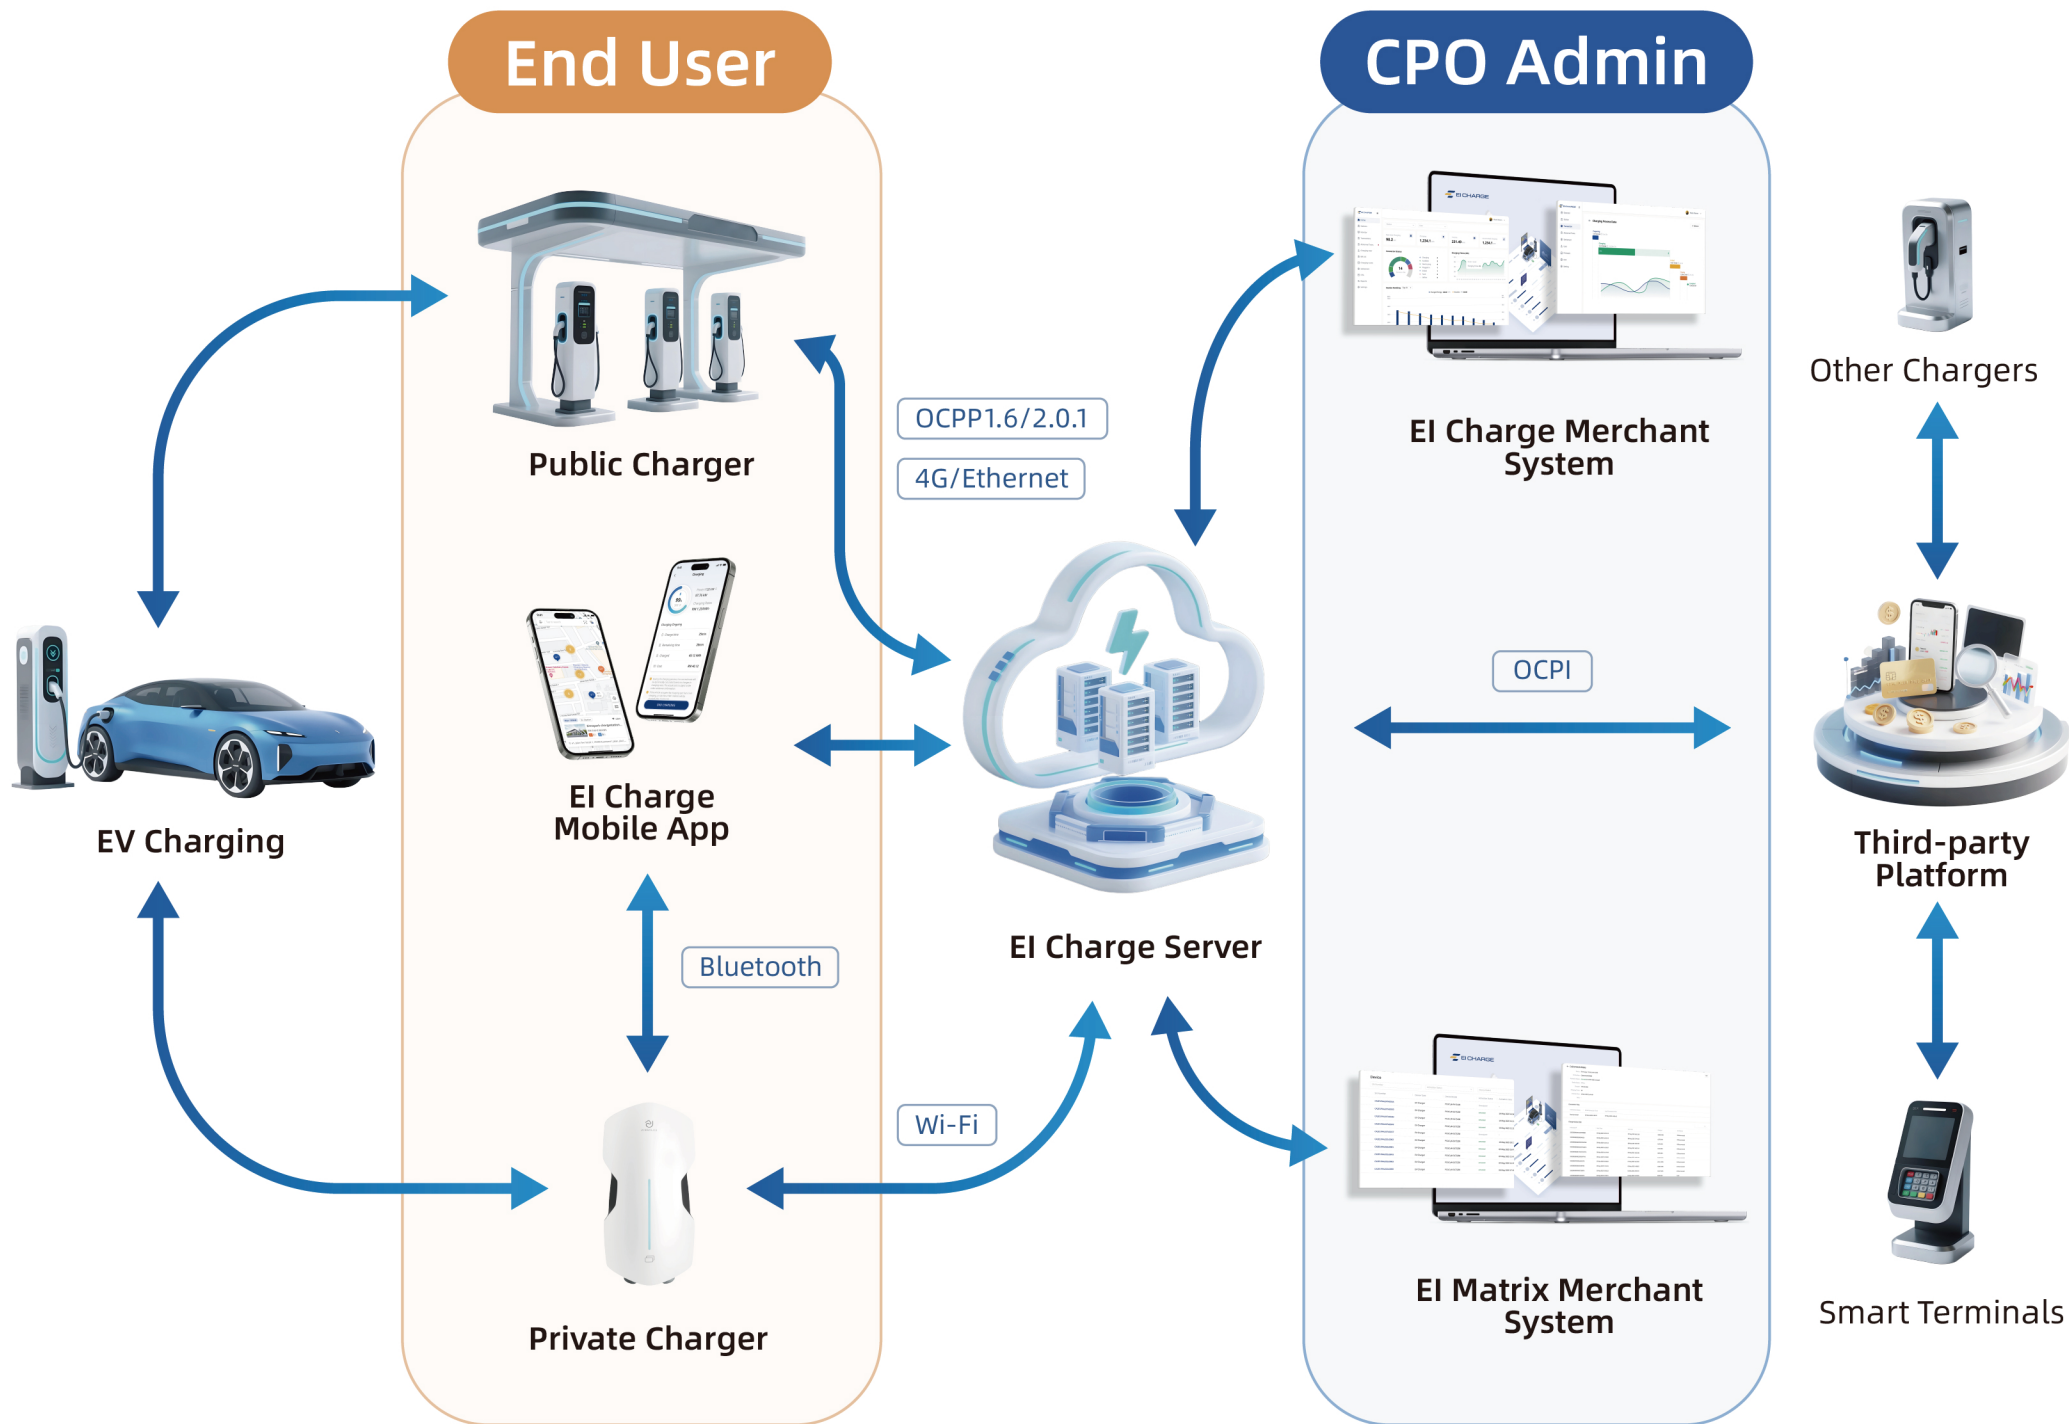

Flexible Organizational Structure Management

Implement hierarchical management of operation permissions through role-based permissions and hierarchical department settings.

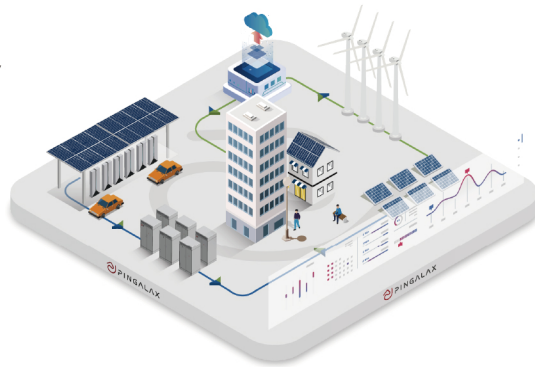

Efficient Operation and Maintenance Management

Flexibly create different types of stations, chargers and connectors, configure multiple pricing rules, and perform remote firmware upgrades (OTA).

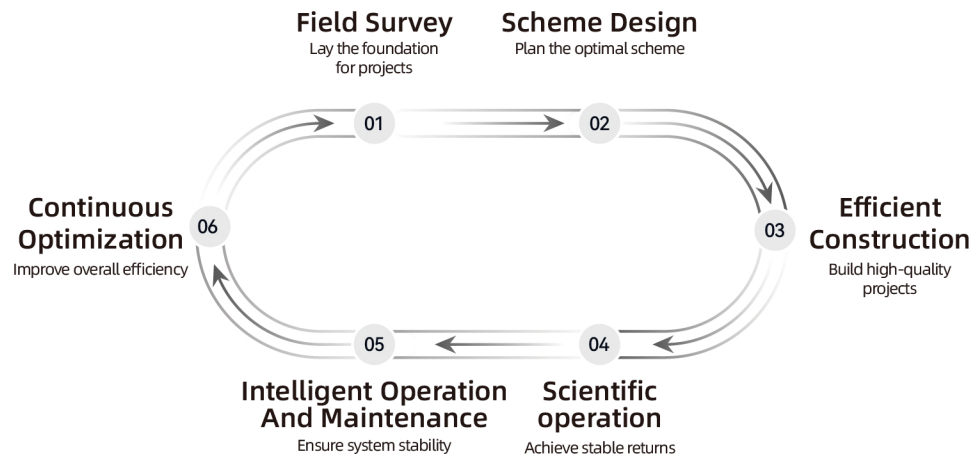

► Deeply Integrated Distributed Energy Network

PINGALAX insists on deeply integrating new energy core technologies and digital intelligent technologies. In application scenarios, we build a new energy system with the collaborative participation of photovoltaics, energy storage, and V2G, and creates a microgrid for PV-ESS-Charging-Using with intelligent charging as the core.

► One-Stop Solution For Your New Business

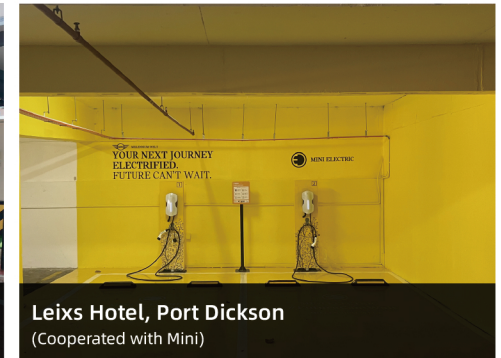

► Charging Network for Global Partners

We deeply cooperate with trusted partners worldwide, leveraging our respective strengths to achieve value delivery.

Malaysia

Zenith Hotel, Kuantan
(Cooperated with BMW)

Leixs Hotel, Port Dickson
(Cooperated with Mini)

Thailand

TPI Polene (Pak Khao San Station), Saraburi

SIAM Technology College, Bangkok

More countries and regions coming soon. Welcome onboard!
